EDUCATION

Baderia Global Institute of Engineering and Management
BTech Computer Science & Engineering

Jabalpur, Madhya Pradesh, India

August 2023 - June 2027

CGPA: 7.71 5th Sem

TECHNICAL SKILLS

Programming Languages: Core Java, C/C++, HTML, CSS, Javascript, Bootstrap,

Frameworks and Tools: SpringBoot, Github

Databases: MySQL

PROJECTS

- **Attendance Management System (Currently testing phase on)** - Currently I am building, as part of a 3-person team, a full-stack college attendance ecosystem using React Native, Node.js, Express, MongoDB, and Socket.io that eliminates proxy attendance through multi-factor verification — including real-time WiFi BSSID fingerprinting, biometric face recognition, and live random pop-up checks — with a real-time teacher dashboard, offline-resilient spoof-proof timer, and an Electron admin panel for complete system management.
- **SaaS License Reclamation Engine (Zombie Subscription Auditor)** — Built a full-stack automated license management system using Spring Boot, MySQL, Spring Security, and Thymeleaf that eliminates wasted SaaS subscriptions by cross-referencing HR employee data with vendor license usage to detect zombie licenses (terminated employees) and low-usage premium accounts, featuring a state-machine-driven inbox-zero workflow, email-based user verification with deadline enforcement, mandatory admin accountability through justifications, comprehensive audit trail, scheduled automated checks, and cost-savings analytics dashboard. [GithubCodeLink](#)
- **DarshanEase — Temple Darshan Ticket Booking Platform** — Full-stack app using Node.js, Express, MongoDB, React, Tailwind CSS with JWT auth, RBAC (User/Organizer/Admin), organizer approval workflow, darshan slot booking with seat tracking, Normal/VIP ticketing, QR code e-tickets, temple & event management, donations, feedback moderation, admin analytics dashboard with charts & PDF export, and a saffron-themed responsive UI. [GithubCodeLink](#)
- **AI Search Visibility Analyzer** — Building an AI-powered website analysis platform using Spring Boot, Jsoup, REST APIs, and React that evaluates how effectively websites are optimized for AI-driven search engines and LLM-based discovery systems. The platform performs automated website crawling, heading structure analysis, FAQ detection, structured data (Schema.org) analysis, content readability assessment, citation and entity evaluation, and generates an AI Visibility Score with actionable recommendations to improve discoverability across AI search platforms.
- **Enterprise Bus Reservation & Dynamic Scheduling Platform (Currently Building)** — Building a full-stack enterprise-grade multi-tenant transportation management ecosystem using Spring Boot, MySQL, JWT Authentication, and RBAC that enables provider onboarding, route and stop management, recurring and custom schedule overrides, dynamic fare calculation based on base fares, bus types, categories, amenities, discounts and subcharges, real-time seat inventory management, end-to-end booking lifecycle tracking, passenger feedback management, audit logging, and passenger/operator/admin dashboards for scalable transportation operations.

CERTIFICATIONS

- **Received Top Performer (Open Innovation Track) certificate at HACKSAGON 2025 National-Level Hackathon** held at ABV-IIITM, Gwalior.
- Participated in IEEE CIS Winter School on Computational Intelligence and Generative AI at IIT Indore.
- Earned two participation certificates in Internal College Hackathons

ACHIEVEMENTS

- **Elite + Silver Certification** | Secured a rank among the **Top 5% performers** in India in the NPTEL course "Software Testing" offered by IIT Kharagpur.
- Solved **100+ problems on LeetCode**, strengthening Data Structures and Algorithm skills.
- Earned the **"50 Days Badge 2025"** on **LeetCode** for consistent daily problem-solving.
- Top Performer – **HACKSAGON 2025 National-Level Hackathon**.
- Team selected in the **IIT Guwahati Entrepreneurship Hackathon**

EXTRACURRICULAR ACTIVITIES

- Secured **1st Position in Intra-School Chess Competition** during school.
- Represented school as a member of the football team in the **Boys JSSC Football Tournament (Class XII)**.
- Participated in college-level chess competition.
- Member of the **college football team**, representing the institution in an **Inter College Football Tournament**.
